

# MOHAMED SAMIR

Front-End Developer | Python Automation

[LinkedIn](#) | [GitHub](#) | [ms5395832@gmail.com](mailto:ms5395832@gmail.com) | +201102152653

## Summary

---

Motivated Software Engineer with a strong foundation in programming, data structures, algorithms, and software development principles. Experienced in building responsive web applications using React.js, JavaScript, and modern front-end technologies, with a growing specialization in Python automation, web automation, data processing, and Excel automation. Passionate about writing clean, maintainable code, automating repetitive tasks, solving technical problems, and continuously learning new technologies to build efficient and reliable software solutions.

## Experience

---

### Python Automation Engineer

*Current Position*

- Develop Python-based automation solutions to reduce repetitive manual tasks and improve operational efficiency.
- Automate data processing and Excel-based workflows using Python, Pandas, OpenPyXL, and XlsxWriter.
- Develop reliable and maintainable automation scripts based on business requirements.

iSchool — Coding Instructor

## Skills

---

**Python Automation:** Python | Selenium | Web Scraping | Pandas | OpenPyXL | XlsxWriter | Excel Automation | Data Processing | geopy

**Frontend Development:** HTML5 | CSS3 | Bootstrap | JavaScript | React.js | Responsive Design

**Backend & APIs:** RESTful APIs | API Integration | FastAPI (studying)

**Architecture & Concepts:** State Management | Component-Based Architecture | Clean Architecture, Modular Design

**Performance & Code Quality:** Performance Optimization | Code Maintainability

**Programming & Problem Solving:** Data Structures & Algorithms | Problem Solving | Java | C++ | Python

**Database Management:** SQL | MySQL | Database Design & Management

**Tools & Version Control:** Git | GitHub | Vercel

## Projects

---

### Personal Portfolio [LiveDemo](#)

Built a fully responsive and modern personal portfolio website showcasing skills and projects. Utilized React Hooks (useState, useEffect) and modular, reusable components for scalable, clean, and maintainable code.

## E-commerce App [GitHub Rebo](#)

F-Developed a modern, scalable, and responsive e-commerce platform with product listing, cart functionality, and efficient state management, Applied best practices in code organization, modular design, and reusable components to enhance maintainability, scalability, and performance.

## Landing page [Live Demo](#)

Developed a responsive task management web application using modern frontend technologies. Implemented clean UI/UX and optimized performance for a smooth user experience.

## React Todo App [GitHub Rebo](#)

Built a dynamic Todo Application using React Implemented full CRUD operations (Add, Edit, Delete, Mark as Complete) Managed state using useState hookUsed Local Storage to persist tasks

## Mawakiet ElSalah App (Prayer Times App) [GitHub Rebo](#)

Developed a Prayer Times application using React Fetched real-time prayer timings using a public REST API Implemented dynamic city selection Managed state using useState and useEffect Displayed daily prayer schedule with clean and responsive UI Handled API loading and error states

## Cources

---

- **Front-End Web Development** — HTML5, CSS3, JavaScript | Mahara-Tech & Udemy
- **Python Scripting & Automation** — Coursera
- **Database Management Systems** — SQL & Mysql

## Education

---

Bachelor's Degree in Computer and Information Science(Computer Science Department), Menoufia University

## MILITARY SERVICE

---

Military Service Status: Completed

## Language

---

- Arabic: Fluent
- English: Very Good
